Spotting a tiger depends on which side of the bed you get out of. *But what if you are in bed?*

Luck can be a bit of a wretch when it comes to game sighting.

Depending on which side of the bed you get out of, you either get to see a tiger or a jungle cat. But what if you are in bed?

We at Taj Safaris have installed infrared, night-vision motion sensor cameras outside every room at Pashan Garh in Panna.

These glorious gadgets shoot and catch all the animals that may have visited you at night.

Which at Panna means leopards, tigers, wild boar, hyenas and deer.

Of course this is not to suggest that other wonderful things are not amiss in our safari parks at Bandhavgarh, Pench or Kanha.

Banjaar Tola at Kanha for instance has twenty-two animal species and two-hundred bird species.

Mahua Kothi, Bandhavgarh has the highest density of tigers in the sub-continent.

And finally, Pashan Garh in Panna is pregnant with tigers, leopards, sambar and chital.

Indeed, all very lovely. Including some lovely things for the kids.

Pug marks preserved in plaster and posterity or guided tours with our richly knowledgeable naturalists.

Now, the weather this season is perfect. And our offers are bright and sunny.

Which leads us to believe that you must book without hesitation.

On our part, we will only be utterly delighted to spot you and your pack.
